

Northeast Interceptor (NEI) Repairs

Summer Construction Projects

Greenville Loop Road (See map on back)

Description: Line almost one-half mile of pipe near Shinnwood Road, replace air release valves, and replace manholes at Hewlett's Creek pump station.
Cost: \$1.8 million
Construction: August-November, 2007

Hewlett's Creek pipe replacement (See map on back)

Description: Replace more than one mile of pipe that currently runs through Hewlett's Creek.
Cost: \$2 million
Construction: August, 2007-January, 2008

Pump Station Improvements

Description: Replace junction box at Bradley Creek pump station, and install interim pumps at both NEI pump stations.
Cost: \$2.2 million
Construction: August-December, 2007

Long-term improvements

Expansion of NEI

Description: Expand NEI pump stations and construct alternate pipeline to the Northside Wastewater Treatment Plant
Cost: \$20.2 – \$27.7 million
Timeline: December 2006-November 2009

Rehabilitate existing NEI

Description: Rehabilitate existing NEI force main once the expansion is completed.
Cost: \$2.1 million
Timeline: March 2009-May 2010
